

ATTENTION

Please review the information below on acceptable masks and face coverings at The Corvallis Clinic:

Vented masks and face shields are not acceptable face coverings inside The Corvallis Clinic.

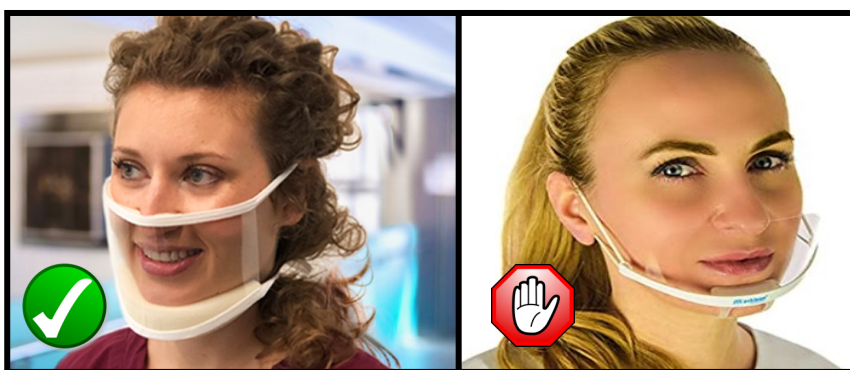

Masks with a small plastic vent allow the wearer's breath to leave the mask and potentially release COVID-infected particles.

Acceptable

Cloth masks, procedure masks, non-vented N95 masks

Not Acceptable

Vented face masks, vented N95 masks, face shields

For patients that are hard of hearing/read lips, the photo on the left covers the nose and mouth fully and is acceptable. The photo on the right is not acceptable as the mask does not cover the nose.

Thank you for your understanding. Patient and staff safety is our #1 priority.
